

## COMMISSIONERS' NOTICE

## Estate of David Graham White

The undersigned, having been appointed by the Honorable Probate Court for the District of Orleans, Commissioners, to receive, examine and adjust all claims and demands against the estate of David Graham White, late of Craftsbury, in said district, deceased, and all claims exhibited in offset thereto, hereby give notice that we will meet for the purposes aforesaid at the house of the late David Graham White, on the 8th day of August and 5th day of September next, at 9 o'clock, p. m., until 5 o'clock, p. m., each of said days, and that six months from the 9th day of June, A. D. 1908, is the time limited by said Court for said Creditors to present their claims to us for examination and allowance.

Dated at Craftsbury, Vt., this 2nd day of July, A. D. 1908.

JOHN KEIR, Com'rs

28-30

## Estate of Emma F. Gilman of Glover

STATE OF VERMONT, In Probate Court, District of Orleans, ss. held at Newport, in said District, on the 14th day of July, A. D. 1908.

F. C. Williams, Administrator de bonis non, with will annexed of the estate of Emma F. Gilman late of Glover, in said District, deceased, presents his administration account for examination and allowance, and makes application for a decree of distribution and partition of the estate of said deceased. Whereupon it is ordered by said Court, that said account and said application be referred to a session thereof, to be held at the Probate Office in said Newport, on the 3rd day of August, A. D. 1908, at 9 o'clock in the forenoon for hearing and decision thereon. And it is further ordered that notice hereof be given to all persons interested, by publication of the same three weeks successively in the Orleans County Monitor, a newspaper published at Newport, and that they may appear at said time and place, and show cause, if any they may have, why said account should not be allowed, and such decree made.

By the Court, Attest, F. E. ALFRED, Judge.

28-30

## Estate of Elizabeth A. Templeton

The undersigned, having been appointed by the Honorable Probate Court for the District of Orleans, Commissioners, to receive, examine and adjust all claims and demands against the estate of Elizabeth A. Templeton, late of Glover, in said district, deceased, and all claims exhibited in offset thereto, hereby give notice that we will meet for the purposes aforesaid, at the dwelling of C. P. Bean, in Glover, on the 1st day of August, 1908, and on the 5th day of September, 1908, at 9 o'clock, p. m., until 5 o'clock, p. m., each of said days, and that six months from the 24th day of June, A. D. 1908, is the time limited by said Court for said Creditors to present their claims to us for examination and allowance.

Dated at Glover this 8th day of July, A. D. 1908.

CHAPIN LEONARD, Com'rs

28-30

## Josephine D. Foster's Estate

STATE OF VERMONT, In Probate Court, District of Orleans, ss. held at Newport, in said District, on the 8th day of July, A. D. 1908.

E. W. Barron, executor of the last will and testament of Josephine D. Foster, late of Barton, in said District, deceased, makes application for license to convey certain real estate of said deceased in said Barton, representing that said Josephine D. Foster, in her life executed a valid contract in writing binding both in law and in equity, to convey to one Napoleon Closter, of said Barton, all buildings being situated on land owned by the Boston & Maine Railroad and said land subject to an annual rent to said Railroad Company; being the same premises conveyed to said Josephine D. Foster, November 17, 1888, by William W. and Matilda E. Brockway, said deed recorded in Book 24, Page 370, of the Land Records of said Barton. Conditioned in said contract that said Napoleon Closter should pay to said Josephine D. Foster Five Hundred Dollars, to be paid in installments as therein named; and that upon the payment of said last named installment, said Josephine D. Foster covenanted to give to said Napoleon Closter a good and valid deed of said premises that said Napoleon Closter is now ready to perform the conditions named in said contract, and make said payments in full, whereby he is entitled to a deed of said premises as provided by said contract.

Wherefore said petitioner prays for license to convey said premises upon the performance of the conditions named therein by said Napoleon Closter, in accordance with the provisions of the Statute in such case provided. Whereupon it is ordered by said Court that said application be referred to a session thereof, to be held at the Probate Office in said Newport, on the 31st day of July, A. D. 1908, for hearing and decision thereon. And it is further ordered that notice hereof be given to all persons interested by publication of the same three weeks successively in the Orleans County Monitor, a newspaper published at said Barton, previous to said time appointed for hearing, that they may appear at said time and place and show cause, if any they may have, why said license should not be granted.

By the Court, Attest, F. E. ALFRED, Judge.

28-30

## Auction Sale

I will sell at Public Auction at West Glover, Vt., Saturday, Aug. 1st, 1908, at 2 o'clock p. m., the contents of the late Catherine Cameron, deceased, situated in the village of West Glover and being her late home place containing about two acres of Land with House and Barn and plenty of Fruit Trees thereon and being only five minutes walk from store and post office and two minutes walk from church. These buildings are in good repair, conveniently arranged and pleasantly located.

Any person desiring a neat city home will have a chance to own one on the above date at their own price.

C. E. HAMBLET, Admr.

BARTON, VT.

## John McDonald's Will

STATE OF VERMONT, In Probate Court, District of Orleans, ss. held at Barton, in said District, on the 10th day of July, A. D. 1908.

An instrument purporting to be the last will and testament of John McDonald late of Glover, in said district, deceased, being presented to the court by Elizabeth G. McDonald, executrix therein named, for probate. It is ordered by said court, that all persons concerned therein be notified to appear at a session of said court, to be held at F. W. Baldwin's office at Barton in said district on the 14th day of August, A. D. 1908, and show cause if any they may have, against the Probate of said will for which purpose, it is further ordered that a copy of this record of this order be published three weeks successively in the Orleans County Monitor, a newspaper published at said Barton previous to said time appointed for hearing.

By the Court, Attest, F. E. ALFRED, Judge.

A true copy of record,

29-31

## COMMISSIONERS' NOTICE

## Estate of Julia M. Cook

The undersigned, having been appointed by the Honorable Probate Court for the District of Orleans, Commissioners, to receive, examine and adjust all claims and demands against the estate of Julia M. Cook late of Barton in said District, deceased, and all claims exhibited in offset thereto hereby give notice that we will meet for the purposes aforesaid at town clerk's office in Barton on the 7th day of August, 1908 and 8th day of September, 1908, next from two o'clock, p. m., until 4 o'clock, p. m., each of said days, and that six months from the 10th day of July, A. D. 1908, is the time limited by said Court for said Creditors to present their claims to us for examination and allowance.

Dated at Barton, Vt., this 18th day of July, A. D. 1908.

## AGRICULTURAL EDUCATION.

(The following article was prepared and sent us for publication by E. S. Watson of Newport, superintendent of the Newport district, and will prove of great interest to farmers and educators. (Ed.)

The second annual conference of the District Superintendents' Association of Vermont was held in Burlington July 13-18. Though many side issues received attention during the week, the main topic was that of elementary agriculture for rural schools.

Soils and soil management were discussed by Prof. J. L. Hills of the University of Vermont.

The deficient plant food elements of the soil were indicated and some emphasis laid upon the relationship of the use of lime to the correction of faulty soil conditions, particularly the amelioration of over-retentive clays and the neutralization of acid soils.

The bacterial life of soil was dwelt upon and the relationship of micro-organisms to the preparation for plant uses of mineral and organic plant food, and to the growth of clover and legumes.

The moisture relations of the soil, the great call of plant life upon the capillary water of the soil and the relationship thereto of adequate tillage were outlined. The present drought offers an object lesson of the benefits of inter-tillage. One can readily note to-day the difference between a well and an ill tilled piece of corn in the character of the foliage, in one case the broad, flat, green thrifty leaf, in the other withered and dry. Tillage saves water and increases plant growth. Some little hint was given of the philosophy of tillage, and the killing of weeds relegated to its proper subordinate place.

The only point made under soil management was as to the fertilization of the soil. It was pointed out that while Vermont farmers pay half a million of dollars per year for commercial fertilizer, they waste ten times that amount through inadequate care of farm manures. The three sacks in which fertility is brought to the farm, the clover sack, the feed sack and the commercial fertilizer sack were referred to; the one enriching the surface soil from the sub-soil and air; the other increasing the plant food content of the manure owing to its inherent richness; and the third bringing a direct plant food increment to the soil. The advisability of making wiser purchases of commercial fertilizers, of buying either crude stock or high grade goods was emphasized, and stress laid on the folly of purchasing low priced, low grade brands containing from 500 to 1,000 pounds of extraneous dirt. The safeguards thrown about the trade by the Vermont law were indicated and ready means shown whereby one could, with very fair degree of certainty, discriminate between grades. The simple one, two, three rule works well. A fertilizer guaranteed to contain one per cent or thereabouts of nitrogen may be safely considered low grade goods, those containing two per cent medium grade, and those containing three per cent are sure to be high grade goods.

Prof. L. R. Jones discussed grasses and clovers. He stated that good farmers, in a vague way, include the forage plants of the pasture and meadow under the term grass, an incorrect view which has led to popular confusion. The true grasses are more widely useful than any other similar group of plants. They include the cereals and the main forage and pasture plants. They are characterized by slender stems with frequent solid joints or nodes. The stems are usually hollow but sometimes solid. The leaves are slender bladed, clasping the stem like a sheath above the nodes. They arise one from each joint in two opposite rows. The flowers are usually borne on slender branches, forming open clusters or dense heads.

The hay and pasture grasses in Vermont are many in number, but 16 only deserve special mention; 10 being valuable for hay or pasture and six being rated as weeds. The principal hay grasses are timothy, orchard grass, meadow fescue, June grass or Kentucky blue-grass. Canadian blue-grass, fowl meadow grass, red top, blue-joint, reed canary grass and the manna grasses. The prominent weed grasses are quack, poverty grass, fox tail, barnyard and crab grasses.

The clovers are not grasses. They belong to the pea family; are nitrogen gatherers and well recognized and valuable adjuncts to the farm economy, improving the animal ration and bettering the soil in which they grow. Interesting statements concerning the leaves, blossoms, fruit and seed were made and distinctions drawn between the various clovers commonly grown in Vermont. Some little attention was paid likewise to the consideration of alfalfa and one or two other legumes. Statements were made concerning the cultivation of grass and clover; the values of various grasses for pasture and other purposes and as to the impurities of grass and clover seed.

The speaker stated that bulletin 34 of the Vermont Experiment station, dealing with Vermont grasses and clovers, is likely to be revised in the near future and issued for distribution. It has been for some time practically out of print, although largely called

for by the teachers and scholars of the state.

Prof. Jones also spoke upon some phases of forestry. He called attention to the fact that three-fifths of Vermont is woodland, that four-fifths of the cleared land is grass land, and that over 90 per cent of its acreage is growing grasses or trees. Moreover grass and tree culture problems are the most pertinent, and least fully solved of the rural problems. The solution of each must be largely a matter of time and education, begun with the school children.

The superintendents and rural school teachers can do much to better forestry conditions in Vermont by teaching the children to recognize the different trees and their values and to appreciate the worth, to the state and to individuals, of timber lands.

These have their value for aesthetic purposes, for water conservation, for soil protection and for timber supply. The rural and other schools may become centers of education in growing and caring for shade trees and forest trees. Attention was directed to the fact that bulletins have recently been published for free distribution relating to the white pine and to the planting and care of shade trees.

From 30 to 60 kinds of trees are to be found near each school. Children may well make collections of the leaves of each kind, which, properly pressed and labeled, could ornament the walls and form the subjects of winter lessons and composition.

The relations of Vermonters to the forest may be classified under four periods. First, the pioneer period when trees were looked upon as enemies, to be destroyed before a home could be built. Then came the period of the hill farmer, who mowed the pasture, spruce and pine much as he cleaned the grass from the corn field. Young conifers were looked upon as weeds and even to-day are so regarded by too many hill farmers. Yet the most profitable thing that can be done with many pastures overgrown with brakes and hardhack is not only to permit but to encourage natural reforestation and to supplement this process by artificial planting. The third period was that of the lumberman when the tree became an asset, land owners vying with each other as to who could strip his woodland fastest; the old trees for saw logs, the young trees for pulp. We are now coming to the fourth period when trees are regarded as a crop, the period of the forester. The lumberman seeks only the saw logs, the forester harvests this but aims so to do it as to perpetuate and not destroy the forest. Under proper management the forest crop may be maintained and improved generation by generation.

Intelligent methods in forestry are coming to stay because they pay. Vermont waste lands are capable of growing timber crops of the highest value.

She has and will produce the best white pine, spruce and hard woods like white ash. A case was cited of second growth white pine yielding \$800 per acre on the stump and retailing from the mill at \$5,000. While this is exceptional it is practicable under proper methods to duplicate this result on extensive areas. When this time comes Vermont will pass from the ranks of the relatively poor to those of the relatively wealthy states, acre for acre. The important thing to hasten this day is to create the right sentiment toward the tree, to promote a proper appreciation of the relative importance of timber lands and to inculcate correct methods in reforestation.

A plan was then outlined whereby the superintendents may secure seeds and seedlings from the state nursery which may be used in establishing school gardens. Children planting and caring for such will learn to appreciate their value as in no other way, can transplant them to ornament the grounds, to line the roadsides or to start little forestry plantations of their own. Working thus an important contribution may be made not merely to the personal wealth of the individual but to that of the community and the state.

Prof. C. L. Beach discussed "The Individuality of the Cow." He gathered his audience at the college farm barns and illustrated his remarks by reference to charts and to living animals led out before the gathering. He said in part that the ability to utilize food profitably into milk and butter varies with individuals. Among both ordinary and pure bred cows the variation in this respect is remarkable.

Competition among business concerns impels them to obtain the largest returns for the money expended. The various production factors are carefully scanned and the incapable dispensed with. "Out and forever out" the incompetent and unworthy go" should be the motto in the management of a herd. Cows should be studied individually and the unprofitable ones "weeded out." Although the final proof of the value of any cow and of her right to be kept in the herd should depend upon her ability as shown by the milk, scaled and Babcock test, it often happens that a dairyman must rely upon his own judgment in the selection of cows.

The milk and butter producing qualities of cows are accompanied by a

general vigor, conformation, temperament, fineness and other qualities that are quite characteristic. The essential points of a good dairy animal are ample digestive capacity, large milk organs, well developed nerve system and refinement or lack of superfluous flesh.

Digestive capacity. Milk is a manufactured article, produced by the cow from her food. Her capacity for producing depends largely upon her capacity for digesting and assimilating food, a quality indicated by a long, deep and wide barrel with well sprung ribs.

Milk organs. The udder should be large and symmetrical. Its activity is indicated somewhat by the amount of blood passing through it, which depends upon the capacity of the blood or "milk veins" which are connected therewith.

The nerve system should be well developed for through this system the activity of all the organs of digestion, assimilation and elaboration of milk are aroused, controlled and harmonized.

Refinement or lack of flesh. The energy of the dairy cow is directed toward the production of milk. This tendency has been increased by breeding, inheritance and development and the tendency to lay on flesh has been restrained. This has resulted in an animal with a fine head and neck; light front quarters; hind quarters thin, incurved at rear and sides; sharp withers; spare crops and a thin bony angular body devoid of all unnecessary flesh. These four essential qualities of a dairy cow of any breed are formulated in a score card which serves to standardize the judgment of one who would wish wisely to judge a dairy cow.

Prof. Beach also presented many valuable points regarding the feeding of stock and demonstrated the Babcock test for butter fat.

President K. L. Butterfield of the Massachusetts Agricultural college spoke upon "The Rural School as a Community" and Prof. Hart of the same institution discussed the topic "Some Bearings of Elementary Science upon Elementary Agriculture."

The week was one of rare benefit to the Vermont superintendents, who hope to put many of its suggestions into practice.

QUICK RELIEF FOR ASTHMA SUFFERERS  
Foley's Honey and Tar affords immediate relief to asthma sufferers and it taken in time will effect a cure. F. D. Pierce, Barton; F. J. Kinney, Barton Landing.

## M. E. CAMP MEETING.

Annual Bible School and District Camp Meeting Held at Lyndonville August 6-16.

Following is the official program of the St. Johnsbury District Bible School and District Camp Meeting to be held at Lyndonville August 6 to 16.

Thursday, August 6: 7:30 p. m., opening sermon, Rev. M. H. Smith, Concord.

Friday, August 7: 8:00 to 8:30 a. m., Morning Watch; also each day, same hour, in charge of Rev. I. A. Ranney and Rev. I. P. Chase; 11:00 a. m., lecture, "Evidences of Christian Experience," Rev. F. E. White, Lyndon; 1:00 p. m., Children's meeting, and at the same hour every day. Rev. C. W. Kelley, Sheffield; 1:30 p. m., lecture, "The Art of Questioning," No. I, Rev. J. M. Frost, St. Johnsbury; 2:30 p. m., lecture, "The Church and Its Teaching Function," Rev. William Shaw, Enosburg Falls; 6:30 p. m., tent prayer meetings, and each following evening; 7:30 p. m., sermon, Rev. A. W. Hewitt, Plainfield.

Saturday, August 8: 11:00 a. m., lecture, "The Good Samaritan," Rev. F. E. White; 1:00 p. m., lecture, "The Art of Questioning," No. II, Rev. J. M. Frost; 2:00 p. m., lecture, "The Work of the Holy Spirit," Rev. William Shaw; 3:30 p. m., Bible reading, the first in a course of three on "Studies on the Epistles of Peter," Miss Ruth G. Barr, Greensboro Bend; the outline for this reading will be "The Christian's—Inventory—Privileges—Responsibilities—Duties." 7:30 p. m., sermon, Rev. I. A. Ranney, West Topsham.

Sunday, August 9: 10:30 a. m., sermon, Rev. C. D. Lance, Newport; 2:00 p. m., sermon, Rev. William Shaw, Enosburg Falls; 7:30 p. m., sermon, Rev. J. M. Frost, St. Johnsbury.

Monday, August 10: 11:00 a. m., lecture, "The Prodigal Son," Rev. F. E. White; 1:00 p. m., lecture, "The Art of Illustrating," No. I, Rev. J. M. Frost; 2:00 p. m., lecture, "The Adult Bible Class Teacher," Rev. William Shaw; 3:30 p. m., Bible reading, Miss Ruth G. Barr; "The Christian's—Character—Conduct—Purpose—Danger Signals." 7:30 p. m., sermon, Rev. I. P. Chase, Guildhall.

Tuesday, August 11: 11:00 a. m., lecture, "The Elder Brother," Rev. F. E. White; 1:00 p. m., lecture, "The Art of

Illustrating," No. II, Rev. J. M. Frost; 2:00 p. m., lecture, "Jesus Christ as a Man of Letters," Rev. R. J. Chrystie, Ph. D., Woodstock; 3:30 p. m., Bible reading, Miss Ruth G. Barr; "The Christian's—Triumphs—Food—Rewards." 7:30 p. m., sermon, Rev. A. C. Brown, Newbury.

Wednesday, August 12: 10:45 a. m., sermon, Rev. A. B. Enright, Lunenburg; 2:00 p. m., anniversary of the Woman's Missionary societies. Address in the interest of the W. F. M. S., Mrs. Mary H. Chappell, Tokio, Japan; address for the W. H. M. S. S., speaker to be announced; 7:30 p. m., sermon, Rev. G. W. Douglass, Danville.

Thursday, August 13: Epworth League convention. 10:15 a. m., praise service; 10:30 a. m., business; 10:45 a. m., "The Epworth League as a Vital Force in Our Church Life," Rev. D. G. Guest; "The Epworth League as a Vital Force in Our Spiritual Life," Mrs. M. A. Turner; "The Epworth League as an Evangelistic Agency," Rev. R. J. Chrystie, Ph. D.; round table, "Needs of Our Epworth Leagues and How to Meet Them," Mrs. E. A. Staples, 1st Vice President; 2:00 p. m., praise service; 2:15 p. m., business; election of officers; 2:30 p. m., "Our Junior Leagues," Rev. C. W. Kelley; 2:50 p. m., convention sermon, Rev. E. A. Legg, Conference President, Bradford; consecration service, Rev. R. J. Chrystie, Ph. D.; 7:30 p. m., address, Rev. E. F. Newell, Ph. D., Hardwick.

Friday, August 14: 10:00 a. m., sermon, Rev. E. E. Wells, Irasburg; 2:00 p. m., sermon, Rev. L. N. Moody, Island Pond; 7:30 p. m., sermon, Rev. Fred Williams, Troy.

Saturday, August 15: 10:45 a. m., sermon, Rev. J. A. Martin, Derby; 2:00 p. m., sermon, Rev. M. S. Eddy, Groton; 7:30 p. m., sermon, Rev. D. G. Guest, East Burke.

Sunday, August 16: 9:30 a. m., love feast, Rev. I. P. Chase; 10:30 a. m., sermon, Rev. E. F. Newell, Hardwick; 2:00 p. m., sermon, Rev. F. E. White, Lyndon; 7:30 p. m., closing sermon, Rev. W. B. Dukeshire, Barton.

The Bible School occupies the first half of the ten days, except that evenings and Sunday are reserved for evangelistic services.

The meeting will be under the direction of the Rev. F. W. Lewis of St. Johnsbury, district superintendent, and president of the Camp Meeting association. The music will be in charge of the Rev. M. A. Turner of East Burke, who has led it for the past two years. "New Songs of the Gospel," No. 3, will be used, the same as last year. The singing will be supported and supplemented by instrumental music.

The children's meetings will be conducted by Rev. C. W. Kelley of Sheffield, who has had such marked success in this work since he undertook it two years ago.

The Morning Watch will be a brief devotional service held each morning from 8 to 8:30 under the supervision of the Rev. I. A. Ranney and the Rev. I. P. Chase.

The Rev. A. B. Enright will have special charge of the Police Department, and the same excellent order that has characterized the past three years will continue to be maintained.

Supervision of the vesper service, which will this year take the form of tent prayer meetings, is committed to the Rev. M. H. Smith, who will do what he can to encourage and promote such meetings as may be practicable.

By special vote of the association, some time is reserved for recreation on each week day. This is approximately from 8:30 to 10:30 a. m. and from 4:00 to 4:30 to 6:00 p. m. according to the services. The tennis court and croquet grounds will be in condition, the Abnaki golf club will doubtless extend the usual courtesies, and any legitimate recreations will be allowed. Contemplating players of golf or tennis will bring the usual supplies.

The Ladies' Aid society of Lyndonville has received high praise for the quality of accommodations provided at the boarding house. Board and room will be \$4.50 per week, or \$1.00 per day, and the usual attention will be paid to the comfort of the guests.

One of our good farmers was telling on the streets yesterday a conversation he chanced to hear between a young boy in his teens and a Christian Scientist. It appears that the Scientist came across a small boy sitting under an apple tree doubled up with pain. "My little man," he said, "what is the matter?" I ate some green apples," moaned the boy, "and, oh, how I ache!" "You don't ache," answered the follower of Mrs. Eddy; you only think so." The boy looked up in astonishment at such a statement, and then replied in a most positive manner: "That's all right; you may think so, but I've got inside information."

## Fertilizers for Summer and Fall Top-Dressing and Seeding Down.

Up-to-date farmers are agreed that in many cases better results are obtained on meadows from fertilizers which are applied in the summer or early fall. This is true both as to top-dressing and seeding down.

We wish to call the attention of the farmers of Vermont to the fact that we can furnish formulas for mixing fertilizers especially adapted to top-dressing and seeding-down grass land. These formulas have not only been approved by the Vermont Experiment Station, but have been used with excellent results by a great many farmers in Vermont and have proved thoroughly reliable. We can also furnish the materials for mixing fertilizers in accordance with these formulas. We should be pleased to send the formulas together with full directions for mixing, cost of materials, etc., to any one who will write us, mentioning this paper. Address CARROLL S. PAGE, Hyde Park Vt.

## TAXPAYERS OF ALBANY

## TAX NOTICE

The taxpayers of this town are hereby notified that the tax bills assessed on the Grand List of this town for the year A. D. 1908 are in my hands for collection. A discount of 4 per cent, will be allowed on all taxes paid to me on or before ninety days from date hereof. The ninety day limit expires October 12th next. Taxes not paid at that time will be placed in the hands of the collector, to be collected according to law.

Albany, Vt., July 14-24

M. B. CHAFFEY, Town Treasurer

## WANTED BUTTER &amp; EGGS

We pay Highest Chamber of Commerce Prices for Dairy and Creamery Butter Hennerly and Store Eggs.

## F. M. BILL CO.

20 Lewis Wharf, Boston, - - Mass.

Inquire at Monit Office or write T. B. Hustwick, Barton, Vt. Box 216.

## The place to buy your HAYING TOOLS

is where you can select from a Large Stock. We aveh them in abundance.

One HAY TEDDER and one HORSE RAKE cheap to close out.

PARIS GREEN and BUG DEATH, SPRINKLERS and BLOWERS.

## Cow Comfort

For the Cattle brings great results. Every can guaranteed.

## No doubt you have heard of our FRUIT JARS.

They are something new in that line, and cost no more than the ordinary Jar. Fresh Bread every day from now on.

Yours for a square deal, D. A. Brahana IRASBURG, VT.

## St. JOHNSBURY ACADEMY.

ST. JOHNSBURY, VT.

Sixty-sixth year opens Tuesday, Sept. 8, at 9.30 a. m.

Fits for Colleges and Scientific Schools. Its certificates are accepted for admission by Colleges and Scientific Schools that admit upon certificate. Commercial Department trains in Book-keeping, Typewriting and Stenography. Instruction in Art and Vocal Music. Charlotte Fairbanks Cottage offers all the comforts of her own home to girls. South Hall with Steam Heat, Electric Lights, Furnished Rooms, and wise supervision, is a good place for boys. The very best of opportunities for an education at the least possible cost. Send for illustrated catalogue.

C. P. HOWLAND, Principal.

## FOLEY'S KIDNEY CURE

Will cure any case of Kidney or Bladder Disease not beyond the reach of medicine. No medicine can do more.

For Sale by F. D. PIERCE, Barton, Vt., F. J. KINNEY, Barton Landing, Vt.
